## *A Format for Decision Making: Docket Research and Management*

This program explores the best ways to most effectively search the millions of dockets and documents that previously fell outside the reach of traditional legal research.

## *From the Top Down: Responding to a Data Breach*

Plan now for when a data breach occurs to prevent your firm, your client or your company from appearing in the data breach headlines. Learn the potential impacts and sources of a data breach and how to plan and respond.

## *Avoiding the Million Dollar Comma: The Use of Forms in Legal Drafting*

The use of forms in drafting legal documents is just one way to increase efficiency and work product quality while at the same time mitigating some of the risk associated with each document. Explore source, types and benefits of forms, find appropriate motion templates, using a form bank.

## *Blowing Smoke: Managing New Risks in the Workplace*

The National Institute of Drug Abuse puts the cost of substance abuse to our nation at \$600 billion in terms of crime, lost work productivity and health care. With workplace drug and alcohol testing laws and regulations changing constantly, discover the history and background of drugs and the workplace, medical marijuana and a drug free workplace, establishing impairment levels and workplace challenges.

## *A Forgotten Fact is News: Researching Expert Witnesses*

In recent months, multimillion dollar verdicts have been overturned and expert witnesses have been sentenced for perjury – all with what the expert had hoped were “forgotten facts.” Learn to uncover unflattering facts or successful daubert challenge strategies using the latest in technological advancements.

## *Drinking from a Fire Hydrant: Basic Legal Research in the Age of Technology*

Technological advancement has enabled humanity to retain and process seemingly endless amounts of information. Nowhere is that more true than in the American legal system. Making sense of the water pouring from that particular fire hydrant is the focus of this course on the fundamentals of basic legal research in the age of electronic legal research.

## *Find A Remedy: The Role of the Mediator*

This course features nationally known mediations experts who examine the role of the mediator. You'll learn to research the appropriate standards of conducts and ethical opinions, develop the best criteria to select a mediator for your client, and to recognize that factors impact the role of the mediator – including how mediators attempt to resolve impasses.

## *Finding Out is Better: Effectively Using Technology for Factual Discovery*

Nearly all government agencies now maintain their records electronically. The key is to find a tool to help you compile this public information in a quick and easy format. This CLE will highlight the efficiencies gained when attorneys use technology.

## *Following, Friending & Pinning: The Intersection of Social Media and Evidentiary Principles*

According to the Pew Research Center, 73% of online adults use at least one social media platform. That number grows daily. Learn how to apply evidentiary principles to this medium, discover and build sound strategies to uncover sources and results on an electronic legal research platform and stay up to date on the trends in social media as well as the social media activities of key players in cases as well as gain an understanding of how social media has taken such an important role in society as a whole.

## *Putting on the Writs: Habeas Corpus in the Federal Courts*

Learn the history and purpose of the Habeas Corpus, governing federal statutes and rules for review of state convictions, along with Federal Habeas Corpus process.

## *The Modern Campfire: Discovering the Right Stories Using Advanced Legal Research Techniques*

Technology has been described as “the campfire around which we tell our stories” and that is especially true in the legal profession. As technology has allowed greater amounts of information to be retained, legal documents are becoming longer and longer and can no longer be ignored. Becoming technologically savvy and staying abreast of advancements is at the very core of the competency of the legal profession. In this course, we will explore the latest technological advancements, strategies for efficiently researching and more.

### *What You Didn't Know: Six Critical Steps in Medically Centered Litigation*

In the context of Medically centered litigation we've devised six critical steps to help you close the gap between what you know to look for and what you didn't even know you needed. We'll explore how technology can help close the gap. In this CLE, you learn to identify and analyze the critical components of a medically-centered litigation, recognize the ethical requirements to use modern technology for increased efficiency, and effectively research a medical malpractice case.

### *When it Doesn't Stay in Vegas: A Lawyer's Guide to Workplace Social Media Policies*

These days when employees want to complain about their boss or employer, they post it in social media outlets such as Facebook® or Twitter®. So what's an employer to do? Employers must recognize that social media has changed the labor and employment landscape forever, and they must draft policies that will pass muster with the National Labor Relations Board. In this CLE, we'll explore social media and discuss connectivity between employees, the role of the NLRB and social media policy language.

### *Your Library is Your Portrait: Using Technology to Improve Accessibility and Effectiveness*

In today's world of bi-coastal clientele and bar admissions, attorneys must be able to access their library from locations around the country and the world. In this program, you learn to identify and analyze the costs of a print library, recognize the ethical requirements to make the most effective use of technology, develop criteria to evaluate digital libraries and publications, and become familiar with the functionalities of a digital library solution.

### *Answering the Call: Overcoming Substance Abuse in the Legal Profession*

In this course, you will examine the characteristics of the legal profession that make attorneys so much more susceptible to substance abuse as well as review the wildly disproportionate disciplinary records.

### *From a Different Perspective: The Ethical Challenge Presented By Social Media*

Each person's social media activity is dependent on their perspective, making the collection of relevant data all that much more difficult. This CLE will focus on how the courts define social media and metadata, identify the emerging issues that social media presents when it intertwines with litigation, recognizing and avoiding ethical pitfalls, acquire sound strategies and best practices to obtain and preserve relevant social media posts and metadata.

### *Ignored Facts Do Not Cease to Exist: Understanding Metadata*

This CLE is designed to help you learn what questions to ask yourself, your clients and your firm or company about metadata to avoid the many ethical pitfalls associated with metadata and inadvertent disclosure and discovery.

### *Silence of All Virtues: Attorney-Client Privilege and Confidentiality*

In the fast paced, high information era in which we live, how do you maintain client confidentiality and privilege while still meeting the demands of the client? In this course we will cover the importance of protecting client confidences, understanding electronic media, finding ethical solutions to inadvertent disclosures, ethical implications of using cloud storage and navigating the ethical minefields of social media as legal professionals.
